floorOX™

Premium,
High Performance
Hard Surface Cleaner Disinfectant

Stabilized & Enhanced H₂O₂ Based
Concentrated Formula
Freshly Fragranced

Bactericidal | Fungicidal |
Virucidal | Sporicidal

Manufactured at:

WHO GMP, GLP, ISO Certified Unit
Sanmed Healthcare Pvt Ltd

floorOX is a freshly fragranced, high performance concentrated surface cleaner disinfectant. It combines antimicrobial efficacy on bacteria, yeast and viruses with good cleaning performance. The product is based on a low concentration of hydrogen peroxide ensuring compatibility with many materials.

floorOX is developed for the cost effective disinfection and cleaning of larger areas like floors, walls, ceilings, work spaces, etc. in demanding applications. It is advised to use microfiber based floor spray mops and concentrate dispensers for this product.

Compatibility with different surface materials

We recommend testing concentrated products before use in an invisible place. The products are tested extensively in material compatibility tests, but to avoid any problems, testing beforehand is recommended. Most floor materials will not be a problem. Porous floors require extra caution.

Benefits

- Cleans and disinfects in One.
- No VOCs, alcohol, chlorine & quats.
- Suitable for high risk infection areas.
- Effective deodorizer

Features

- Freshly fragranced
- Dilutable to different level of efficacy
